

ENVIRONMENTAL POLICY STATEMENT

HG Construction Limited (Hereafter called the Company) are committed to preventing a negative environmental effect by operating in such a way that our work activities provide protection of the environment and prevent pollution.

The Company will be proactive in environmental control and to self-regulation rather than being reactive after the event. We are aware of how our activities impact upon the environment and seek to minimise adverse effects by means of the best available techniques not entailing excessive cost, through a policy of environmental improvement at the workplace, control of pollution and care for the environment.

An essential feature of the Environmental Management System is a commitment to continually improve our environmental performance. This is achieved by setting annual environmental improvement objectives and targets, which are regularly monitored and reviewed.

In order to ensure the achievement of our environmental commitments, the organisation will implement an Environmental Management System that satisfies the requirements of ISO 14001.

Wherever possible in purchasing its materials, equipment and consumable items the Company will give preference to purchasing items which do least environmental harm, which are not supplied with excessive packaging, and which are benign or at least harmless in their effect on the environment. The company will also encourage the use of sustainable land based resources and certified timber products.

We will actively encourage our suppliers and contractors to have a proper regard for our Environmental Policy with respect to the goods and services they provide for us.

Taking into account the nature of work the Company will seek to minimise the generation of wastes, by introducing recycling initiatives for materials, equipment and consumables where reasonably practicable, in order to help protect the environment and make better use of resources.

Working to current legislation and regulatory standards are deemed to be the minimum requirements, but the Company objective is to surpass this minimum standard. This philosophy is accepted and implemented from the Board of Directors and throughout the workforce

WASTE DISPOSAL

The Company is committed to ensuring the health, safety and welfare of its employees and of others who may be affected by the waste materials, which result from our work. Our policy is to arrange for the disposal of all waste products regularly, safely and in accordance with statutory requirements. These arrangements will be regularly reviewed.

This policy will be regularly monitored to ensure that the objectives are achieved. It will be reviewed and, if necessary, revised in the light of legislative or organisational changes at least on an annual basis.

On behalf of
HG Construction Limited

Adam Quinn
Managing Director (North)
